

Taufik Hidayah

Senior Frontend Developer

Cimahi, West Java, Indonesia | thidayaaah@gmail.com | <https://github.com/thidayah>

Profile Summary

Senior Frontend Developer with over 6 years of experience building digital products that serve real business and user needs. Experienced in delivering web and mobile solutions across multiple industries, from enterprise systems and healthcare platforms to marketplaces and community-driven applications.

Known for translating complex requirements into intuitive user experiences while maintaining a strong commitment to clean architecture, performance, continuous improvement, and delivering solutions that create real value for both users.

Core Technologies

Frontend Development:

React.js, Next.js, React Native, Vue.js, Svelte, JavaScript, TypeScript, Redux

UI & Styling:

Tailwind CSS, Shadcn/UI, Ant Design, Responsive Design

API Integration:

RESTful APIs, Websocket, GraphQL

Backend & Database:

Node.js, Laravel, PostgreSQL, MySQL, Supabase, Firebase

Tools & Collaboration:

Git, Postman, Claude, DeepSeek, Figma, Trello

Selected Projects

Paseero

A marketplace platform connecting users and merchants with auction-based transactions and integrated online payments. Contributed to both web and mobile application development, API integration, and transaction workflows.

Tech Stack: React.js, React Native, Paystack

Route Art

A route-sharing platform that helps users discover, navigate, and contribute creative running routes shaped as unique objects, animals, and artworks. Built route visualization, GPX download functionality, community submission workflows, and CMS management features.

Tech Stack: Next.js, Tailwind CSS, Leaflet, Supabase

ReTrack

A route planning and activity tracking platform for running, walking, and cycling activities. Developed route creation tools, map visualization, activity statistics, and GPX/TCX export capabilities compatible with third-party fitness platforms.

Tech Stack: Next.js, Tailwind CSS, Leaflet

Prasync

A centralized platform for legal information, journals, and tax consultation services integrated with AI-powered Taxation and real-time communication features. Contributed to frontend development, API integration, and implementation of responsive and scalable user interfaces.

Tech Stack: Next.js, Tailwind CSS, AI Taxation

Ruang Pasar

A marketplace platform for agricultural product ordering and business management. Contributed to frontend development, payment gateway integration, and user experience improvements for both customer and merchant workflows.

Tech Stack: Laravel, Midtrans, Xendit

Yubi Chat

A mobile community management application featuring real-time messaging and engagement tools. Developed mobile interfaces, integrated APIs, and implemented WebSocket-based communication features.

Tech Stack: React Native, Redux, WebSocket

eDot

A social media platform connecting users with merchant products and communities through a mobile-first experience. Developed mobile application features, API integrations, and user engagement interfaces.

Tech Stack: React Native, Redux, GraphQL

Daily Tax

A tax management platform featuring accounting modules, tax reporting, and downloadable business reports. Built responsive interfaces and integrated backend services to support operational workflows and reporting processes.

Tech Stack: React.js, RESTful APIs
